**PRESCRIBING AUTHORITY:** DoD Instruction 5400.16, "DoD Privacy Impact Assessment (PIA) Guidance". Complete this form for Department of Defense (DoD) information systems or electronic collections of information (referred to as an "electronic collection" for the purpose of this form) that collect, maintain, use, and/or disseminate personally identifiable information (PII) about members of the public, Federal employees, contractors, or foreign nationals employed at U.S. military facilities internationally. In the case where no PII is collected, the PIA will serve as a conclusive determination that privacy requirements do not apply to system.

EBS Increment 3 is a point-of-sale system the Defense Commissary Agency uses to validate shopping privileges through the Defense Manpower Data Center's web services.

If the customer pays by personal check, the front and back of the check and customer ID card will be imaged.

If the appropriate ID card does not have a barcode or appropriate ID number then the Social Security Number is used.

In Korean commissaries only, a ration card can be used to identify the customer

**d. Why is the PII collected and/or what is the intended use of the PII?** (e.g., verification, identification, authentication, data matching, mission-related use, administrative use)

PII is collected to authenticate customer privileges and accept payments.

**e. Do individuals have the opportunity to object to the collection of their PII?** ☒ Yes ☐ No

(1) If "Yes," describe the method by which individuals can object to the collection of PII.

(2) If "No," state the reason why individuals cannot object to the collection of PII.

DoD policy requires DeCA to validate shopping privileges. U.S. Treasury policy requires a customer ID for electronic check processing through OTCnet (U.S. Treasury's Over The Counter Channel). OTCnet is required by DoD policy. If the information is not provided then shopping privileges will not be allowed.

**f. Do individuals have the opportunity to consent to the specific uses of their PII?** ☒ Yes ☐ No

(1) If "Yes," describe the method by which individuals can give or withhold their consent.

(2) If "No," state the reason why individuals cannot give or withhold their consent.

Customers can pay with cash if they do not wish to provide PII.

If customers do not want to participate in digital coupons or other promotional activities, the customer can elect to not participate in "opt in" registration activities.

**g. When an individual is asked to provide PII, a Privacy Act Statement (PAS) and/or a Privacy Advisory must be provided.** (Check as appropriate and provide the actual wording.)

(a) Cite the specific provisions of the statute and/or EO that authorizes the operation of the system and the collection of PII.

(b) If direct statutory authority or an Executive Order does not exist, indirect statutory authority may be cited if the authority requires the operation or administration of a program, the execution of which will require the collection and maintenance of a system of records.

(c) If direct or indirect authority does not exist, DoD Components can use their general statutory grants of authority ("internal housekeeping") as the primary authority. The requirement, directive, or instruction implementing the statute within the DoD Component must be identified.

DoD policy requires authentication of customers to ensure they are entitled to shop at a commissary; this is achieved by validating the customer has commissary privileges associated with their ID card by querying the DMDC database using encrypted web services. Treasury electronic check processing via OTCnet requires a patron identifier as part of the data exchange which supports the bad check list maintained by Treasury. Offline processing of credit card tenders requires the POS to retain credit card information in an encrypted format until the connection is restored.

In accordance with DoD Instruction 1330.17, the patron's EDIPI is required to verify entitlement to shop at the Commissary. The EDIPI is processed through an encrypted DMDC database to validate the patron's commissary privileges.
